Abap Programming Guidelines - atcloud.com

Our semantic data model is defined by Core Data Services (CDS). Core Data Services are views on top of the dictionary tables. In the CDS layer you can use and manipulate data that is persisted in the database.. The projection is a subset of the fields of the underlying data model, that are relevant for the application. For example UI annotations would be part of a projection view.

Get to Know the ABAP RESTful Application Programming Model

Programming languages enable us to say the same thing in different ways. While all of them may be correct, some may be more efficient, easier to understand, and more robust than others. Our style guides want to show up differences and guide you towards code that has a healthy balance between all of these qualities. Style Guides. Clean ABAP

GitHub - SAP/styleguides: This repository provides SAP ...
