When a new area is unlocked, you can choose to buy one of the adjacent areas in the area view to expand your city. Some of the areas can have water areas, highways, and/or natural resources. You can have a total of nine areas unlocked by the end of the game, but this could be increased to a total of 25 areas or even 81 areas with Steam Workshop modifications.

The SQL COUNT function is an aggregate function that returns the number of rows returned by a query. You can use the COUNT function in the SELECT statement to get the number of employees, the number of employees in each department, the number of employees who hold a specific job, etc. The following illustrates the syntax of the SQL COUNT function:

A Cities: Skylines 2 announcement may not have been on our radar just a few months back, but recent developments have made the idea far, far more interesting to us. That is, it's specifically the lack of recent developments that has made us intrigued. The prospect is simple: game sequels are a concept as old as the medium itself, and though we're waiting for Pong 2 still, Cities: Skylines 2 ...
