### Crocodile Life Cycle Diagram

Crocodile - Crocodile - Natural history: The young crocodile emerges from the egg with a length of 20-30 cm (8-12 inches). At first it remains with its siblings concealed at the edge of its water habitat in order to avoid various predators. Principal among these are fishes and birds, but larger crocodiles also prey upon the young.

### Crocodile - Natural history | Britannica

All life cycles have a beginning and an end; a simple life cycle has three stages. The hatching eggs of a crocodile mark the beginning of a new generation of crocodiles and death is the end.
