Evolutionary Psychiatry, second edition on Apple Books

'Anthony Stevens and John Price have got together in Evolutionary Psychiatry to propose a "revolutionary" new way of understanding mental illness by means of Darwinian theory. They argue persuasively that conditions like depression, anxiety, personality disorders, and schizophrenia are the result of environmental maladaptation of strategies embedded in the phylogenetic makeup of the human species.'

Evolutionary Psychiatry, second edition: A New Beginning ...

Routledge 1996; £15.99 (paperback) ISBN 0 415 13840 Stevens and Price's opening gambit is that we have not one but three, evolutionary distinct, brains. If, like me, you've struggled in vain with neuroanatomy, this suggestion won't exactly bring tears of joy. But the idea is worth pursuing. The authors argue that at birth, there are, within the evolutionarily ancient parts of our brains, a ...
