

Acces PDF Fuzzy Min Max Neural Networks For Categorical Data

## Fuzzy Min Max Neural Networks For Categorical Data

If you ally infatuation such a referred **fuzzy min max neural networks for categorical data** ebook that will have enough money you worth, acquire the totally best seller from us currently from several preferred authors. If you desire to droll books, lots of novels, tale, jokes, and more fictions collections are moreover launched, from best seller to one of the most current released.

You may not be perplexed to enjoy all books collections fuzzy min max neural networks for categorical data that we will agreed offer. It is not not far off from the costs. It's virtually what you craving currently. This fuzzy min max neural networks for categorical data, as one of the most operational sellers here will

## Access PDF Fuzzy Min Max Neural Networks For Categorical Data

certainly be among the best options to review.

Now that you have a bunch of ebooks waiting to be read, you'll want to build your own ebook library in the cloud. Or if you're ready to purchase a dedicated ebook reader, check out our comparison of Nook versus Kindle before you decide.

### **Fuzzy Min Max Neural Networks**

Abstract: A supervised learning neural network classifier that utilizes fuzzy sets as pattern classes is described. Each fuzzy set is an aggregate (union) of fuzzy set hyperboxes. A fuzzy set hyperbox is an n-dimensional box defined by a min point and a max point with a corresponding membership function. The min-max points are determined using the fuzzy min-max learning algorithm, an expansion-contraction process that can learn nonlinear class boundaries in a single pass through the data and

3 Fuzzy min-max neural network The FMM classification model learns by forming hyperbox fuzzy sets in its structure. The size of a hyperbox is controlled by  $h$ , which varies between 0 and 1. When  $h$  increases from a small to a large value, the size of hyper-boxes increases, while the number of hyperboxes created reduces.

The Fuzzy Min-Max (FMM) network is a supervised neural network classifier that forms hyperbox fuzzy sets for learning and classification. In this paper, we propose modifications to FMM in an attempt to improve its classification performance in situations when large hyperboxes are formed by the network.
