How Animals Talk

Animals don't so much understand the words of language, but the tone of how the words are spoken. They also use other signals, such as body language, to get their message across. It is absolutely possible to communicate with animals, but the use of speech or language is a relatively minor part.

3 Ways to Communicate with Animals - wikiHow

A talking animal or speaking animal is any non-human animal that can produce sounds or gestures resembling those of a human language. Several species or groups of animals have developed forms of communication which superficially resemble verbal language, however, these usually are not considered a language because they lack one or more of the defining characteristics, e.g. grammar, syntax, recursion and displacement. Researchers have been successful in teaching some animals to ...
