A very readable and helpful (and inexpensive) book for IFR trainee's. I carry this book everywhere to snatch just 5 minutes here and there as I lead up to my IFR test. It's a less than half-an-inch thick paperback full of very focussed IFR procedure and practices. Of the five IFR books I have, this is the most useful and most used.

I just recieved my instrument rating and the majority of flying I've done under an IFR flight plan is a standard flight, airport to airport. Recently we've had some days here where the weather would be perfect for getting some cloud time (3000 foot ceiling with tops at 5000), but I'm not sure the best way to file IFR to go out and utilize the practice area and shoot local approaches.
