Java and SOAP 2 Preface The Simple Object Access Protocol, or SOAP, is the latest in a long line of technologies for distributed computing. It differs from other distributed computing technologies in that it is based on XML, and also that thus far it has not attempted to redefine the computing world.

Java and SOAP
SOAP with Attachments API for Java SOAP with Attachments API for Java (SAAJ) is used mainly for the SOAP messaging that goes on behind the scenes in JAX-WS handlers and JAXR implementations. Secondarily, it is an API that developers can use when they choose to write SOAP messaging applications directly rather than use JAX-WS.

SOAP with Attachments API for Java - The Java EE 5 Tutorial
SOAP is an XML specification for sending messages over a network. SOAP messages are independent of any operating system and can use a variety of communication protocols including HTTP and SMTP. SOAP is XML heavy, hence best used with tools/frameworks. JAX-WS is a framework that simplifies using SOAP. It is part of standard Java. 3. Top-Down vs. Bottom-Up

soap java: read and change nodes in xml files. Ask Question ... Viewed 2k times 1. I have a number of pre-generated, static xml files containing soap requests. I can read them, send the request, and get back and answer from the server. I would like to get some advice on how to create a dynamic process:

soap java: read and change nodes in xml files - Stack Overflow
The high level API in SOAP Toolkit needs a WSDL file so this URL points to one of the WSDL files. At this point it doesnt matter which one you provide. Though, the performance is better with the ISAPI listener. Java Client. The second client well write for our Hello2 server is a Java client. I used for this the Apache SOAP 2.1.

Web Services between .NET, Java and MS SOAP Toolkit: Part I
X is a combination of an automated documentation tool and a full authoring environment which can be used to create, publish and maintain accurate, professional quality documentation for .NET, Web Services, Databases, XSD Schemas, COM Components and Type Libraries, Java and Javascript.

Documentation Made Easy - Innovasys
Create SOAP Web Service Using Eclipse. Let's make a very basic soap web service in java using eclipse ide that will find square of a number. Make sure eclipse contains following things. Apache Tomcat: It is the server for running our web service. Apache Axis: It is the tool that is used to create web service using java class. 1.

Java SOAP Web Services Tutorial - The Java Programmer
Java implementations of SOAP usually provide a specific binding for the JMS (Java Messaging System) protocol. Content-Type The Content-Type header for a SOAP request and response defines the MIME type for the message and the character encoding (optional) used for the XML body of the request or response.
