Living Well Depending on your type of epilepsy and the frequency and predictability of seizures, you may have to make adjustments to your present lifestyle. Epilepsy will have an impact on your life, but you can minimise that impact by recognising issues that affect you and managing them in a positive way.

Living Well with epilepsy tips - Epilepsy Queensland

So for some, epilepsy is a long-term condition. Seizure control. For most people, seizures become well controlled (they still have epilepsy but the medication is stopping the seizures) and so it has little impact on them. For others, seizures may take longer to become controlled or may not respond to treatment.
