...

When dividing something by 1, the answer will always be the original number. It means if the divisor is 1, the quotient...

Division by 0 is undefined. The division of the same dividend and divisor is always 1. For example: $4 \div 4 = 1$.

What is Division? - Definition, Facts & Example

Division is the opposite of multiplying. When we know a multiplication fact we can find a division fact:
Example: $3 \times 5 = 15$,
so $15 / 5 = 3$. Also $15 / 3 = 5$.

And the way we would write this, and we'll think a little bit more about what this means, we could write this as 18 over 2. This means 18 divided by 2. We could write it as 18 divided by 2, just like that, or we could write it as 18 divided by 2. Now before we evaluate it, they say find the value of the expression. Let's think
