2. Plan for seed saving Start With Easy Crops. Some crops like peas, beans, lettuce, and tomatoes are great for beginning seed savers. These annual, self pollinating crops require little to no isolation, and only a few plants are needed to reliably produce seeds. Grow Enough Plants. Some crops have a hard time producing seeds when too few ...

Download File PDF Seed To Saving And Growing Techniques For Vegetable Saving Guide | The Old ...

Seeds from many plants can be saved simply by collecting them as they dry. Tomatoes take a bit more work. Tomato seeds are enclosed in a gel-like sack that contains growth inhibitors, which prevent the seeds from sprouting inside the tomato. The best way to remove this gel covering is to allow the fruits to rot
