The Darwin variant (Book, 2018) [WorldCat.org]

The Modern Synthesis was the early 20th-century synthesis reconciling Charles Darwin's theory of evolution and Gregor Mendel's ideas on heredity in a joint mathematical framework. Julian Huxley coined the term in his 1942 book, Evolution: The Modern Synthesis.. The 19th century ideas of natural selection and Mendelian genetics were put together with population genetics, early in the twentieth ...

Modern synthesis (20th century) - Wikipedia

The empathizing-systemizing (E–S) theory is a theory on the psychological basis of autism and male–female neurological differences originally put forward by English clinical psychologist Simon Baron-Cohen.It classifies individuals based on abilities in empathic thinking (E) and systematic thinking (S). It measures skills using an Empathy Quotient (EQ) and Systemizing Quotient (SQ) and ...
