The Patients Wish To Die

The Patient's Wish to Die: Research, Ethics, and Palliative Care brings together that reality and the patient's voice, combining them with different research approaches. It presents the best available knowledge and research methodologies about patients' wishes at the end-of-life, together with a series of ethical views and a discussion about the clinical implications for palliative care.

The Patient's Wish to Die: Research, Ethics, and ...

A wish to die, therefore, does not necessarily imply that a person intends to hasten death, or that the person will act out her or his wish. Patients' statements expressing their wishes about the end of their life can fall into one or more of the following intentions towards dying (first published as a table in):

What a wish to die can mean: reasons, meanings and ...

Despite having the best palliative care, some patients develop a wish to die. The wish to die under these circumstances need not be symptomatic of suboptimal care. However, for those involved in their care, being confronted with a patient who expresses

Home is stated to be where most patients want to die because, as the foreword of the 2008 EOLC Strategy reports, "From surveys of the general public we know that, given the opportunity and right support, most people would prefer to die at home." The extent to which the preferences of the general public reflect the views of dying patients is unclear; the two viewpoints may vary due to differences in priorities and whether preferences asked are hypothetical or of practical significance.

Do Patients Want to Die at Home? A Systematic Review of

...

Two patients died unexpectedly, either at home or on their way to the hospital. Sociodemographic variables such as age, sexual gender, Medicaid status, living arrangements, diagnosis, and pain level did not appear to be related to place of death. The patient's expressed wish for one or the other option seemed the key factor.

Like Nurse2b in ny said, lots of times people in this situation feel very alone and all they want right then is for someone to listen, or just to be physically present. Sometimes people actually need permission to let go- to be told that its ok to die. Empathy, communication, and patience are key in situations like this.

What do you say to a patient who wants to die? - General

...

The thought "I want to die," usually comes up when people are in so much psychological pain that they feel they can no longer bear it. We understand how terrible this pain feels, and we want to help make it tolerable for you. This pain is often made worse by thoughts of being a burden to others or not belonging anywhere.
