Among these are the nature of the ‘self’ (an issue explored here from both anthropological and psychological perspectives by Crook, and Skronowski and Sekidides, respectively), the importance of individual differences (Nettle) and aspects of social cognition such as disgust and social rejection (Schaller and colleagues).

### Self and the Social World - Oxford Handbooks

Your self-esteem relates to how you see and value yourself. If someone has particularly low self-esteem, it means they do not feel that they have much worth in the world. Other people have especially high self-esteem which means they think of themselves as better or more important than other people and this can result in arrogance.
